Introduction to Tensor Calculus for General Relativity

special relativity This is Einstein's famous strong equivalence principle and it makes general relativity an extension of special relativity to a curved spacetime The third key idea is that mass (as well as mass and momentum flux) curves spacetime in a manner described by the tensor field equations of Einstein

INTRODUCTION TO GENERAL RELATIVITY

General relativity is a beautiful scheme for describing the gravitational field and the equations it obeys Nowadays this theory is often used as a prototype for other, more intricate constructions to describe forces between elementary particles or other branches of fundamental physics This is why in an introduction to general relativity it is of

(relativity being too controversial then) Einstein wrote two theories of relativity; the 1905 work is known as "special relativity" because it deals only with the special case of uniform (ie non-accelerating) motion In 1915 he published his "general theory of relativity", dealing with gravity and acceleration Strange things happen in accel-

Lecture Notes on General Relativity Columbia University

of this course is to highlight the geometric character of General Relativity and unveil the fascinating properties of black holes, one of the most celebrated predictions of mathematical physics The course will start with a self-contained introduction to special relativity and then proceed to the more general setting of Lorentzian manifolds

THE SPECIAL THEORY OF RELATIVITY

be understood These principles, and their consequences constitute the Special Theory of Relativity Later, Einstein was able to further develop this theory, leading to what is known as the General Theory of Relativity Amongst other things, this latter theory is essentially a theory of gravitation The General Theory will not be dealt with in

For the man on the street, Einstein and relativity are probably epitomized by this result For the physicist, its importance or $mc^2 = E$ (1-8) + $MAx - (1-7)$ has moved therefore postulate that the radiation has carried with it the equivalent of a mass m , such that Mc^2 But this being an isolated system, we are reluctant to believe that
